PROFILE

Flutter Developer with 2 years of experience building scalable, high-performance mobile applications using Flutter, Dart, and BLoC architecture. Proficient in designing clean and responsive UIs, managing complex application states, and integrating RESTful APIs. Experienced in developing full-featured applications across multiple domains, including e-commerce and location-based services, with a strong focus on performance, maintainability, and user experience.

EDUCATION

Bachelor's Degree in Computer Science

2018 – 2022 | 6'October

City of Culture and Science, Higher Institute of Computer Science.

PROFESSIONAL EXPERIENCE

Flutter Developer

03/2025 – present

Zkham Dev

- Delivered features integrating Google Maps, Firebase Notifications, and REST APIs.
- Applied Cubit state management to build scalable, testable, and maintainable codebases.

Flutter Developer

02/2025 – 03/2025

BayanatZ

- Developed and maintained a task management mobile application using Flutter.
- Conducted code reviews and mentoring, resulting in increased team code quality and reduced bugs.
- Drove efficient team communication and task management, improving team velocity and coordination

Flutter Developer

CodeAlpha

1. Language Learning App.

- An app designed to help users learn Japanese with categorized lists of vocabulary and phrases.
- Includes interactive quizzes to test and track learning progress.

2. Flashcard Quiz App

- An educational app that allows users to create and study from custom flashcards.
- Tracks quiz scores to help users evaluate their performance.

SKILLS

Flutter Development, Dart.

Responsive Design.

Local Database, RESTful APIs, JSON.

OOP, Clean Architecture.

State Management: Bloc, Provider, GetX.

CI/CD

Firebase Integration.

Version Control: Git, GitHub.

PROJECTS

Houlda – Multi-Brand Food Ordering App

- Built a multi-brand food ordering app where customers select a brand before browsing and ordering
- Implemented product browsing with category filtering and local search using BLoC
- Developed a full checkout flow covering cart management, coupon validation, and order processing
- Integrated Google Maps for location selection and branch-based order routing
- Implemented QR-based dine-in ordering, allowing customers to scan a table QR code and order independently in-app
- Prepared payment gateway integrations including Tabby and MyFatoorah

Falafina

- Built a complete food ordering mobile app using Flutter for a local restaurant.
- Implemented key features such as item browsing, cart management, and order tracking.
- Integrated RESTful APIs for dynamic menu and order updates.
- Designed a clean and responsive UI with consistent theming.

- Applied Cubit state management for better scalability and maintainability.

Zakhm – Digital Invitation

- Developed a digital invitation application that generates elegant event cards with integrated QR codes.
- Implemented seamless WhatsApp sharing to deliver invitations to guests instantly with a single tap.
- Built an automated attendance tracking system using QR code scanning for real-time verification.
- Designed a clean, responsive user interface and optimized the overall event management workflow.

Guide my

- A mobile app that helps users find nearby places like supermarkets and hospitals.
- Allows adding new locations if they are not already listed, enabling users to expand the app's database dynamically.
- Provides detailed information about each place, including name, image, type, contact number, and Google Maps location.
- Features an advanced and user-friendly search functionality.

Mini WhatsApp

Developed a mini WhatsApp application during a training program. The project included features such as user authentication, real-time chat, and basic UI/UX design. Worked with Firebase for backend services, including Firestore for real-time database management and Firebase Authentication for user management.

COURSES

The Complete Flutter & Dart Development Course.

- Duration: 50 hours
- Gained comprehensive knowledge in Flutter and Dart, including app development, UI/UX design, and state management techniques.

Mastering Flutter: Responsive & Adaptive UI Design.

- Duration: 15 hours
- Focused on creating responsive and adaptive UIs in Flutter, ensuring compatibility across different screen sizes and devices.
